PROFILE

Self-taught junior fullstack developer with a real SaaS product *in production* — **Oidoo.app**, a kitchen-management app used daily in a working Madrid restaurant. I learned to code the way I learned the kitchen: by shipping. No bootcamp, no degree — every concept applied until it became working software. Background as a station chef at recognised restaurants taught me to perform under pressure, sweat the details, and build processes that actually hold. Looking for a first developer role — fullstack or frontend — where I can contribute from day one.

PRODUCT

Oidoo.app — Kitchen Management SaaS

2024 – present

Founder & Developer

IN PRODUCTION

- Fullstack web app used in a real restaurant: opening & closing checklists, recipe management with cost breakdowns, and live order tracking.
- UX designed around real pain points from professional kitchens; direct user support with response under 24h.
- Built and maintained solo — from idea to production, including auth, real-time database and continuous deployment.

Next.js · TypeScript · React · Supabase · Tailwind CSS · Vercel

STACK & SKILLS

FRONTEND

Next.js · React · TypeScript · JavaScript · Tailwind CSS
· Framer Motion · HTML/CSS

BACKEND & DB

Supabase · Firebase · PostgreSQL · Node.js · REST APIs

TOOLS

Git · GitHub · Vercel · VS Code · Figma (basic)

LANGUAGES

Polish (native) · Spanish (B2) · English (B2)

EDUCATION

High School Diploma (Matura)

General Secondary School · Poland

Responsive Web Design Certification

freeCodeCamp

Inteligencia Artificial (IA) Creativa, 2ª Edición

RTVE

Self-directed study

Next.js · TypeScript · Supabase — official docs + production projects

Availability **immediate** · On-site, hybrid or fully remote in Spain
